GitHub · LinkedIn · Portfolio

Engineering Summary

Developing and validating software for human intracranial electrophysiology, including multichannel neural acquisition, signal processing, spike sorting, and experimental synchronization. Experienced in Python-based neural data pipelines, acquisition hardware integration, and quantitative evaluation against recorded data.

Technical Skills

Neural Data & Signal Processing: SpikeInterface, Kilosort4, MountainSort5; waveform features and unit matching

Neural Acquisition & Tooling: Intan RHD, Neuralynx CSC, MED; probe mapping and acquisition configuration

Machine Learning & Data Science: Python (NumPy, Pandas, scikit-learn, PyTorch, Numba); MATLAB

Selected Engineering Projects

Neural Acquisition and Timing — Implemented

- Built Intan RHD ingestion, probe/channel checks, and SpikeInterface/Kilosort4 processing with waveform and quality-metric extraction.
- Implemented queued PsychoPy/RHX event synchronization, exact-label joins, and affine clock fitting to analyze clock drift and alignment residuals.

Neural Compression Validation — Validated

- Evaluated DarkHorse Neuro compression on 20 million samples (one channel, 32 kHz; 625 s); maximum source-to-MED difference was 0.5 uV, with zero mismatches after rounding source values to whole microvolts.
- Controlled MountainSort5 comparison of rounded inputs preserved all 35,587 spike frames for the compared unit (exact Jaccard 1.0).

Spike Sorting and Neural Processing — Validated

- Implemented waveform-feature evaluation across 38,145 spike snippets and 10 putative O-Sort unit labels; event-family KNN purity at k=5 was 95.04%.
- Measured 54.26% Hungarian-matched KMeans accuracy (ARI 0.3665) for that feature family; neighborhood purity is not sorter accuracy or biological ground truth.

Research Experience

Research Volunteer, UC Davis Health — Z-Lab (Dr. Jie Zheng) — Jul 2025 - Present

- Analyze human epilepsy microwire recordings using O-Sort and SpikeInterface, with attention to waveform structure and unit curation.

Education

M.S. Biomedical Engineering, University of California, Davis — Fall 2026 - Present

Python for Data Science, Professional Concentration, UC Davis Continuing and Professional Education — 2025

M.S. Psychology, Arizona State University — 2023

B.S. Neuroscience, Physiology, and Behavior, University of California, Davis — 2017

Additional Professional Experience

IT Administrator, First Step Communities — Jul 2021 - Present

- Managed IT infrastructure, device provisioning, and reporting automation.

Analyst, Eurofins Test America — Oct 2019 - Jun 2021

- Supported analytical laboratory QA, data review, and standard operating procedures.
